

GateReco User Manual

Client-shareable guide for gate entry operations, GRN handling, reconciliation review, and reporting in the GateReco application.

DOCUMENT TYPE

User Manual

APPLICATION

GateReco

PREPARED FOR

Client / End Users

REFERENCE DATE

April 13, 2026

Scope: This document reflects the currently implemented behavior found in the application codebase and is intended for onboarding, walkthroughs, and operational use.

1. Purpose of the App

GateReco is used to manage warehouse gate operations from entry recording through GRN processing and exception review.

Gate Entry

Gate Out

Verification

Approval

GRN Creation

Reconciliation

Reports

2. User Roles and Access

Role	Main Access
Gate Security	Dashboard, Gate Entry, Reports
Warehouse Executive	Dashboard, Gate Entry (Pending GRNs), Reconciliation Exceptions, Reports
Warehouse Manager / WH Mgr	Dashboard, Gate Entry, Reconciliation Review, Reports, Change Password, GRN Import
Admin	Dashboard, Gate Entry, Reconciliation Review, Reports, Change Password, GRN Import

Important: In the current routing setup, Gate Security users are redirected away from the Reconciliation module even though a security reconciliation view exists in code.

3. Signing In and Session Basics

1. Enter Username.
2. Enter Password.
3. Click **Continue**.

Most screens include a logout action in the top app bar.

Change Password is available only to Admin and Warehouse Manager-like users. The new password must be at least 6 characters and confirmation must match.

4. Main Navigation

The application navigation can include Dashboard, Gate Entry, Reconciliation, and Reports. Desktop users see a sidebar, while mobile users see a bottom navigation bar.

5. Dashboard

Gate Security Dashboard

- Entries (Today/Month)
- Gate In
- Gate Out
- Gate Entry Activity (Last 7 Days)
- Turnaround Time (TAT)

Warehouse Executive Dashboard

- Pending GRNs
- Today's Entries
- Reconciliation Snapshot (Today)
- View Pending GRNs quick action

Manager / Admin Dashboard

- Import GRN Data
- KPI Overview
- Reconciliation Overview
- Approval Overview
- Open Review Queue quick action

6. Gate Entry Module

Gate Security, Manager, WH Mgr, and Admin see the general gate entry management view. Warehouse Executive sees the pending GRN-focused warehouse view.

6.1 Gate Entry List

- search by challan, LR, vendor, or vehicle
- filters: All, Gate In, Gate Out, Today, Yesterday, This Week
- summary cards for Gate In, Gate Out, Today, and Yesterday
- Load More for paginated records

6.2 Creating a New Gate Entry

Only Gate Security users can create a gate entry.

1. Open Gate Entry.
2. Click **Create Gate Entry**.
3. Select Gate Status: Gate In or Gate Out.
4. Enter one or more invoice/challan rows.
5. Complete vendor and transport details.
6. Optionally attach a file.
7. Click **Confirm Gate Entry**.

Each invoice row includes Invoice/Challan Number, Invoice Date, PO Number, Part Number, Quantity, and UOM.

Validation includes challan uniqueness, duplicate prevention inside the form, and required-field checks.

6.3 Editing and Detail View

Warehouse Manager, WH Mgr, and Admin can edit an existing gate entry from the detail screen.

The detail view can show challan, direction, status, timestamps, vendor, transporter, vehicle, driver, items, and attachments.

6.4 Gate Entry Actions

Action	Typical Availability
Verify	Status is inward_created for Warehouse Executive or manager-like roles
Approve	Status is verification_pending for manager-like roles
Close	Status is approved for manager-like roles
Gate Out	Gate In record with no exit time and not already closed

7. Warehouse Executive Flow

Verification

Before GRN creation, executives verify:

- Vendor Name
- Vehicle Number
- PO Number
- Remarks

GRN Creation

Each item row includes:

- Material Name
- Received Qty
- Accepted Qty
- Rejected Qty

Rule: Accepted + Rejected must equal Received.

8. Reconciliation Module

Warehouse Executive View

Executives see **Reconciliation Exceptions** with actionable exception records, detail pages, and session-level import history.

Manager / Admin Review

Manager-like users see **Reconciliation Review** with:

- Matched, Exceptions, Resolved, and Open summaries
- search and status filters
- record detail navigation
- Load More pagination

Status	Meaning in UI
matched	Successfully matched
pending_grn	GRN still pending
grn_not_posted	GRN missing or not posted

Status	Meaning in UI
quantity_mismatch	Quantity mismatch
duplicate_grn	Duplicate GRN issue
wrong_po_material	PO/material mismatch

9. GRN Import Card

Manager-like users have a dashboard import card supporting CSV and XLSX files.

Required columns shown in the UI are poNumber, materialCode, grnNumber, and postingDate.

1. Choose the file.
2. Optionally enable **Auto-run Reconciliation**.
3. Click **Upload**.

10. Reports Module

All main roles can access **Reports & Exports**.

Available report types:

- Gate Entry Register
- GRN Reconciliation Report
- Exception Report

The report toolbar supports search, date range selection, report type selection, and export to Excel or PDF.

Report Summary Examples

- Gate Entry Register: Total Entries, Gate In, Gate Out, Total Qty
- GRN Reconciliation Report: Total Records, Matched, Exceptions, Pending, Qty Diff Total
- Exception Report: Total Exceptions, Open, Resolved

11. Troubleshooting

- If Reconciliation is not visible, verify the user role.
- If Change Password is not visible, confirm the role is Admin or Manager-like.
- If challan is rejected as duplicate, open the existing entry and verify whether it is already recorded.
- If GRN creation is unavailable, confirm the record has been verified and GRN is not already completed.
- If exported files are not visible, check the Downloads folder.

12. Recommended Operating Sequence

1. Gate Security creates the gate entry.
2. Warehouse Executive opens the pending GRN record.
3. Warehouse Executive verifies vendor, vehicle, PO, and remarks.
4. Warehouse Executive creates the GRN.
5. Manager/Admin reviews dashboards and reconciliation results.
6. Reports are exported when needed for review or sharing.
